
WORDSLIDE

Spell fast. Before it falls.

How to Play

Everything you need to know, in about three minutes.

The idea

The mountain is coming apart, and it's raining letters.

Letters tumble down the chute on the left and land in your rack at the bottom of the screen. Your rack holds **seven**. That's it.

To make room, you spell words on the board. Every word you play clears letters out of your rack and scores you points. But the letters never stop coming — and when an eighth one arrives, the one on the end gets shoved off the edge and is **gone**.

Lose too many and you're buried. That's the whole game: **spell fast, before it falls**.

Playing a word

Drag a letter from your rack onto the board. Or **tap** a letter to pick it up, then tap the square you want it on — whichever feels better.

Place as many letters as you like, then hit **Play word**. Changed your mind? **Recall** pulls them all back.

The three rules

- 1. Your first word must cross the ★** in the middle of the board.
- 2. After that, every word must touch a letter that's already there.** No islands.
- 3. Everything has to be a real word** — including any word you accidentally make sideways. If one of them isn't in the dictionary, the whole play bounces back.

Letters you play stay on the board for good. You can't take them back once they've scored.

Scoring points

Every letter is worth something. Rare ones are worth a lot.

Worth	Letters
1 point	A E I O U L N S T R
2 points	D G
3 points	B C M P
4 points	F H V W Y
5 points	K
8 points	J X
10 points	Q Z

The coloured squares

Square	What it does
2L / 3L	Doubles or triples that letter .
2W / 3W	Doubles or triples the whole word . These are the big ones.
★	The centre star. Doubles your first word.

A square only counts the turn you first cover it. Building through one later gives you nothing.

Four ways to score big

Empty your whole rack	Play all 7 letters in one word and get a flat +40 bonus. Risky. Worth it.
Play a Q, Z, X or J	+12 points each , on top of their already-high value. Don't panic and dump them — they're treasure.
Chain your words	Play another word within 25 seconds and your combo goes up. Every step of combo adds 10% to everything. Keep it rolling.
Gold letters	A letter with a golden shine is worth double . They turn up now and then — put them on a 3W.

Powers

You earn ↯ **energy** for every letter you play. Spend it on powers when you're in trouble — or when you're about to do something clever.

Power	Cost	What it does
Slow	18 ↯	Freezes the chute for 8 seconds. The panic button.
Shuffle	14 ↯	Swaps every letter in your rack for new ones. For when you've got nothing.
Vowels	12 ↯	The next 3 letters are guaranteed to be vowels.
Purge	10 ↯	Bins every Q, Z, X and J in your rack.
Golden	26 ↯	Your next word scores double . Save it for something enormous.

A word of advice about **Purge**: it's the cheapest power and it looks like a lifeline. But those letters are worth +12 each. Good players almost never use it.

The bin

There's a bin at the left end of your rack. Drag a letter you truly can't use into it and it's gone — for 8 ↯ . It doesn't count as a lost letter.

Climbing the levels

Hit the **target score** and you clear the level. The board sweeps clean and you carry on — but two things change every single time:

The letters fall faster.

You're allowed to lose one fewer.

	Level 1	Level 5	Level 10
Target score	150	390	690
Letters you can lose	10	6	3

It never stops. There's no winning — only how far you got.

The seven worlds

Beat a world's target score to unlock the next one. Each one finds a new way to make your life difficult.

	World	What it throws at you
1	Mudslide	Slow and sticky. Nothing nasty — learn the ropes here.
2	Landslide	Boulders land on the board and block squares. Spell a word next to one to smash it.
3	Avalanche	Letters stop trickling and start arriving two at a time , in sudden bursts.
4	Volcano	Ember letters are on fire. Play them onto the board before the fuse runs out or they burn up — and that counts as a letter lost. They're worth double.
5	Sandstorm	Gusts scramble the order of your rack, right when you'd worked out what to play.
6	Waterfall	No tricks. Just the fastest, most relentless flow of letters in the game.
7	Blizzard	Frost covers your letters and hides them. You have to remember what's under there.

Volcano

Sandstorm

Blizzard

Three ways to play

Classic	Pick a world and go as far as you can. This is the main event.
Daily Challenge	Everyone in the world gets the exact same letters, in the same order. Two minutes. Come back every day to keep your streak alive — and share your score.
Pass & Play Duel	Two players, one phone. You both get identical letters and two minutes each. Play, then hand it over. Highest score wins the bragging rights.

Five things good players do

- 1. Keep the combo alive.** Two short words back to back beat one clever word you spent 40 seconds finding. The clock on the combo is 25 seconds.
- 2. Don't fear the Q.** Rare letters pay +12 on top of their value. A Q on a triple word is a level all by itself.
- 3. Watch the chute, not the board.** You can see what's coming next. Plan the rack you're about to have, not the one you've got.
- 4. Play short words early.** A full rack is a dead rack. Keep two slots free and you'll always have options.
- 5. Save Golden for a full rack.** Seven letters, a triple word, and double points is the biggest single play in the game.

Now go and beat the mountain.
